Institutional Real Estate Investment Analysis

I. EXECUTIVE PORTFOLIO SUMMARY

|                              |        |
|------------------------------|--------|
| Total Inventory Count:       | 32     |
| Weighted Average Cap Rate:   | 3.81%  |
| Average Cash-on-Cash Return: | -8.49% |

Deal Label Distribution:

Excellent: 3.12%  
Good: 6.25%  
Average: 0.00%  
Bad: 90.62%

The current portfolio scan reveals a highly constrained investment landscape, with a significant majority of properties failing to meet our baseline cash flow and yield targets. While a few opportunities show promising cap rates and positive cash-on-cash returns, the overall weighted average performance metrics are subdued, indicating a seller's market or pricing inefficiencies relative to current rental income and operational costs. Further due diligence is warranted only for the select Tier-1 and Tier-2 assets that demonstrate immediate accretive potential, while the bulk of the pipeline requires re-evaluation or outright rejection based on existing underwriting parameters.

II. PRIORITIZED SOURCING TARGETS

Inventory qualified under institutional Tier-1 (Excellent) or Tier-2 (Good) underwriting parameters.

 11918 Stillwater Dr Houston TX 77070 USA — Excellent

| Purchase Price | Cap Rate | Cash-on-Cash | Mo. Cash Flow | GRM  |
|----------------|----------|--------------|---------------|------|
| \$339,000      | 9.39%    | 14.45%       | \$939         | 6.81 |

Strategic Underwriting Thesis:

This asset presents a robust rent-to-price relationship, evidenced by its strong gross rent multiplier. The elevated cap rate and positive cash-on-cash return indicate efficient capital

deployment with immediate cash flow generation, mitigating initial operational risks. The property's performance metrics suggest a favorable market position, supporting long-term portfolio stability and accretive returns.

**Required De-Risking Actions:**

- Verify actual market rents against Zillow estimates via local property management quotes.
- Conduct thorough physical inspection to validate maintenance assumptions and identify any deferred capital expenditures.
- Confirm current property tax assessment and insurance costs to ensure alignment with underwriting projections.
- Review local eviction rates and tenant demand for submarket stability assessment.

 **15618 Banty Falls Ct Houston TX 77068 USA — Good**

| Purchase Price | Cap Rate | Cash-on-Cash | Mo. Cash Flow | GRM  |
|----------------|----------|--------------|---------------|------|
| \$399,900      | 7.64%    | 6.83%        | \$524         | 7.48 |

**Strategic Underwriting Thesis:**

This asset presents a robust rent-to-price relationship, evidenced by its strong gross rent multiplier. The elevated cap rate and positive cash-on-cash return indicate efficient capital deployment with immediate cash flow generation, mitigating initial operational risks. The property's performance metrics suggest a favorable market position, supporting long-term portfolio stability and accretive returns.

**Required De-Risking Actions:**

- Verify actual market rents against Zillow estimates via local property management quotes.
- Conduct thorough physical inspection to validate maintenance assumptions and identify any deferred capital expenditures.
- Confirm current property tax assessment and insurance costs to ensure alignment with underwriting projections.
- Review local eviction rates and tenant demand for submarket stability assessment.

 **7606 Antoine Dr Houston TX 77088 USA — Good**

| Purchase Price | Cap Rate | Cash-on-Cash | Mo. Cash Flow | GRM  |
|----------------|----------|--------------|---------------|------|
| \$399,995      | 7.09%    | 4.44%        | \$340         | 7.66 |

**Strategic Underwriting Thesis:**

This asset presents a robust rent-to-price relationship, evidenced by its strong gross rent multiplier. The elevated cap rate and positive cash-on-cash return indicate efficient capital deployment with immediate cash flow generation, mitigating initial operational risks. The property's performance metrics suggest a favorable market position, supporting long-term portfolio stability and accretive returns.

**Required De-Risking Actions:**

- Conduct thorough physical inspection to validate maintenance assumptions and identify any deferred capital expenditures.
- Confirm current property tax assessment and insurance costs to ensure alignment with underwriting projections.
- Review local eviction rates and tenant demand for submarket stability assessment.

### III. HIGH-RISK CAPITAL TRAPS

#### 9522 Hanging Moss Trl Houston TX 77064 USA

| Purchase Price | Cap Rate     | Cash-on-Cash   | Monthly Cash Flow | GRM   |
|----------------|--------------|----------------|-------------------|-------|
| \$351,000      | <b>1.94%</b> | <b>-17.94%</b> | <b>\$-1,207</b>   | 14.69 |

##### Risk Assessment:

This asset exhibits severely negative monthly cash flow, a consequence of an exceptionally low cap rate (1.94%) and a deeply negative cash-on-cash return (-17.94%). The high gross rent multiplier (14.69) indicates that the purchase price is disproportionate to the potential rental income, creating an unfavorable rent-to-price ratio. This profile suggests significant capital erosion post-acquisition and does not meet our minimum yield thresholds.

#### 3139 Hazel Park Dr Houston TX 77082 USA

| Purchase Price | Cap Rate     | Cash-on-Cash   | Monthly Cash Flow | GRM   |
|----------------|--------------|----------------|-------------------|-------|
| \$319,900      | <b>1.97%</b> | <b>-17.83%</b> | <b>\$-1,093</b>   | 14.06 |

##### Risk Assessment:

This asset exhibits severely negative monthly cash flow, a consequence of an exceptionally low cap rate (1.97%) and a deeply negative cash-on-cash return (-17.83%). The high gross rent multiplier (14.06) indicates that the purchase price is disproportionate to the potential rental income, creating an unfavorable rent-to-price ratio. This profile suggests significant capital erosion post-acquisition and does not meet our minimum yield thresholds.

#### 2604 Chenevert St Houston TX 77004 USA

| Purchase Price | Cap Rate     | Cash-on-Cash   | Monthly Cash Flow | GRM   |
|----------------|--------------|----------------|-------------------|-------|
| \$400,000      | <b>2.24%</b> | <b>-16.65%</b> | <b>\$-1,276</b>   | 12.79 |

##### Risk Assessment:

This asset exhibits severely negative monthly cash flow, a consequence of an exceptionally low cap rate (2.24%) and a deeply negative cash-on-cash return (-16.65%). The high gross rent multiplier (12.79) indicates that the purchase price is disproportionate to the potential

rental income, creating an unfavorable rent-to-price ratio. This profile suggests significant capital erosion post-acquisition and does not meet our minimum yield thresholds.

12114 Westmere Dr Houston TX 77077 USA

| Purchase Price | Cap Rate | Cash-on-Cash | Monthly Cash Flow | GRM   |
|----------------|----------|--------------|-------------------|-------|
| \$350,000      | 2.46%    | -15.69%      | \$-1,052          | 13.50 |

Risk Assessment:

This asset exhibits severely negative monthly cash flow, a consequence of an exceptionally low cap rate (2.46%) and a deeply negative cash-on-cash return (-15.69%). The high gross rent multiplier (13.50) indicates that the purchase price is disproportionate to the potential rental income, creating an unfavorable rent-to-price ratio. This profile suggests significant capital erosion post-acquisition and does not meet our minimum yield thresholds.

IV. DATA CORRUPTION & UNDERWRITING RISKS

- Missing Zestimate for 15302 Falling Creek Dr Houston TX 77068 USA
- Missing Tax Assessed Value for 267 De Boll St Houston TX 77022 USA
- Missing Tax Assessed Value for 9807 Bamboo Rd #B Houston TX 77041 USA

V. ACQUISITIONS COMMITTEE NEXT ACTIONS

1. **Action 1: Highest Priority Acquisition Review Recommendation.** Immediately initiate advanced due diligence on the property at 11918 Stillwater Dr, Houston, TX 77070, given its leading Cap Rate of 9.39% and strong positive cash flow. This asset represents the most promising opportunity in the current pipeline.
2. **Action 2: Highest Priority Data Validation Recommendation.** Commission an independent appraisal and rent comparability analysis for properties with missing Zestimates or Tax Assessed Values, specifically at 15302 Falling Creek Dr and 267 De Boll St, to mitigate valuation and tax burden inaccuracies.
3. **Action 3: Highest Priority Elimination or Pass Recommendation.** Formally remove all properties with negative cash-on-cash returns exceeding -15.00% and cap rates below 2.50% from the active pipeline, as they present unacceptable risk profiles and do not align with our core investment strategy for cash-flow-focused portfolios. This includes properties like 9522 Hanging Moss Trl Houston TX 77064 USA and 2604 Chenevert St Houston TX 77004 USA.
